

Negative Leads & Charging Springs **18650 Dual Battery Wall Charger**
Item No. TX18650DUALWC

Dual Wall Charger Instructions

The 18650 Dual Battery Wall Charger operates almost the same as its Single Battery Wall Charger counterpart (TX-18650SBWC). The dual charger can charge one or two 18650 batteries with similar or completely different charge cycles at the same time.

Specifications:

- LED Charging Status Indicator
- Charges most 18650 mAh Capacity Li-Ion Batteries
- Input Voltage: AC100-240V – 50/60Hz
- Output Voltage: DC4.2V
- Charging Current: 1000mA
- Built in over voltage, over current and short circuit protection

Follow these three simple steps to recharge your battery:

1. Plug the charger into an AC100-240V Outlet. The **LED Charging Indicator** will turn Green. This indicates that the charger is ready to begin the charging cycle.

2. Insert one or two 18650 Lithium-Ion Batteries, negative end to Charger's **Negative Lead** first, carefully push into the **Charging Spring** then, press the battery's positive end down into the **Positive Lead**. The negative end of the battery should be secure against the Charging Spring. The **LED Charging Indicator** will turn red to indicate the start of a charging cycle. *(Make sure the battery is secure against both positive and negative leads. DO NOT to bend the Negative Lead Charging Spring.)*
3. When the **LED Charging Indicator** turns green, the battery charging cycle is complete. Carefully remove one or both batteries and unplug the charger from the wall outlet.

WARNING! If the Wall Charger makes buzzing sounds and/or becomes **EXTREMELY HOT** to the touch, immediately unplug from outlet and contact us at support@tactxflashlights.com. **DO NOT** continue use.

CAUTION! Always remove the battery and unplug the charger from the wall outlet when charging cycle is complete to prevent overheating and damage to the battery.

CAUTION! Only use 18650 Li-Ion Batteries with this charger that are in good condition. TactX Flashlights is not liable for property damage or bodily harm resulting from the use of this charger.

DANGER! **DO NOT** use charger outdoors. **DO NOT** submerge charger in water. **DO NOT** touch the positive and negative leads of the charger with your hands or objects while plugged into a wall outlet. **DO NOT** allow children to play with charger.
